Education

1992 Ph.D., Physics, University of Colorado, Boulder, CO (Advisor: Carl Wieman)
1987 S.B., Physics, Massachusetts Institute of Technology, Cambridge MA (Advisor: Michael Feld)
1983 Detroit Catholic Central High School, Redford MI

Positions

2018–2019	IonQ, Inc., College Park	Chief Executive Officer
2018–	University of Maryland, College Park	Professor, Electrical and Computer Engineering Dept.
2016–	IonQ, Inc., College Park	Chief Scientist and Co-Founder
2015–	University of Maryland, College Park	Distinguished University Professor
2014–	University of Maryland, College Park	Fellow, Center for Quantum Info. and Comp. Science (QuICS)
2007–	University of Maryland, College Park	Fellow, Joint Quantum Institute (JQI)
2007–	University of Maryland, College Park	Bice Zorn Professor of Physics
2006–2007	University of Michigan, Ann Arbor	Director, FOCUS (NSF Frontier Center on Ultrafast Science)
2006–2007	University of Michigan, Ann Arbor	Professor, Electrical Engineering and Computer Science Dept.
2003–2007	University of Michigan, Ann Arbor	Professor, Physics Dept.
2000–2003	University of Michigan, Ann Arbor	Associate Professor, Physics Dept.
1995–2000	University of Colorado, Boulder	Adjunct Lecturer, Physics Dept.
1994–2000	National Inst. of Stand. Tech., Boulder	Staff Physicist and Project Leader
1992–1994	National Inst. of Stand. Tech., Boulder	NRC Postdoctoral Researcher (Mentor: David Wineland)

Fellowships and Awards

Willis E. Lamb Award for Laser Science and Quantum Optics (2019)
Member, National Academy of Sciences (2016)
American Physical Society Arthur Schawlow Prize for Laser Science (2015)
University of Maryland College of Science Distinguished Faculty Award (2014)
Fellow, American Association for the Advancement of Science (2012)
Scientific American "50" Research Award (2006)
University of Michigan Faculty Distinguished Research Award (2005-2006)
Fellow, American Physical Society (2005)
Fellow, UK Institute of Physics (2002)
Distinguished Traveling Lecturer, American Physical Society Division of Laser Science (2002–)
American Physical Society I.I. Rabi Award (2001)
International Quantum Communication Award, Tamagawa University, Japan (2000)
US Presidential Early Career Award for Scientists and Engineers (1997)
National Research Council Postdoctoral Fellowship (1992-1994)
University of Colorado Feldkamp Award for Graduate Research (1990)

Research Interests

I am an experimentalist in the areas of quantum information systems, quantum computing, quantum communication, atomic, molecular, and optical physics, and quantum optics. My research interests include:

Quantum Information Systems. Quantum information science exploits the properties of quantum superposition and quantum entanglement to store and process information in ways that are not possible classically. I have a longstanding interest in the fabrication of quantum processing systems using atoms and photons, natural carriers of quantum information. This includes the design and realization of entangling quantum logic gates between atoms, the quantum networking of remotely-located atoms with photons, and the scaling to much larger numbers of atomic quantum bits with advanced microfabricated atom trap array and photonic structures.

Cold Atomic Physics. Atoms can be localized to nanometer precision with electromagnetic fields and laser cooling techniques. My interest in this area involves the use of laser radiation to prepare, characterize, and exploit nearly-pure quantum states of internal (electronic) and external (motional) degrees of freedom of cold atoms and ions in order to generate controllable interactions and quantum entanglement for studies of quantum many-body systems.

The Interface between Atomic and Condensed Matter Physics. My group has led the development of atomic quantum simulators that can emulate intractable Hamiltonians that are found in contexts such as quantum magnetism and strongly-correlated condensed matter. We have also developed the use of microfabricated semiconductor structures for confining individual atomic ions in free space, while also characterizing the electrical noise processes of semiconductor and other electrode materials using single atoms as sensitive probes. More generally, I am interested in juxtaposing atomic systems with mesoscopic condensed-matter systems, including photonic couplings between atomic ions and quantum dots and electro-mechanical couplings between mesoscopic oscillators and atoms.

Ultrafast Control of Cold Atoms. I am actively pursuing the use of ultrafast ($\sim 10^{-12}$ s) optical techniques for the manipulation and control of cold atomic systems and the generation of multi-atom entangled quantum states. Ultrafast control eliminates sensitivity to slower decoherence processes, and represents a new regime of ultracold atomic physics.

Foundations of Quantum Mechanics. I have a longstanding interest in foundational aspects of quantum mechanics, from quantum measurement, quantum decoherence, and alternative interpretations of quantum mechanics, to the general phenomenon of quantum entanglement and various forms of Bell's Inequalities. I am interested in quantum metrology and the border between quantum and classical physics as system complexity grows. I enjoy conveying quantum tenets to younger students and the public, with heavy reliance on analogies from the visual and musical arts.

Research Grants

- Over $50M in Federal Research grants since 2000, from NSF, DARPA, IARPA, NSA, ARO, AFOSR, NGA, DOE.
- $5,100,000 in external funding (AY 2018-2019)

Intellectual Property and Patents

- 4 awarded patents
- 20 pieces of intellectual property pending patent awards

Invited Presentations (1994-pres)

- 240 invited talks at conferences and workshops; 180 academic colloquia and seminars
- 26 sets of lectures at academic summer schools on Quantum Science and Atomic/Optical Physics
- 22 public lectures on Quantum Information Science and the Physics of Music

Mentoring (1994-pres)

- 6 Research Scientists
- 38 Postdoctoral Researchers
- 46 Graduate Students in Physics, Chemistry, Computer Science, and Engineering
- 18 Undergraduate Students
- 2 High School Students
