

The University of Maryland Physics is Phun Program
proudly presents

CATCH THE GRAVITATIONAL WAVE!

An artist's impression of two merging black holes. (Courtesy: NASA)

Scientists from UMD and around the world are uncovering a new understanding of the universe through the study of gravitational waves with LIGO, the Laser Interferometer Gravitational-Wave Observatory. Join us for our presentation on the latest discoveries, physics demonstrations, and answers to all your questions as we explore the physics of gravitational waves.

December 1st and 2nd , 2017

7:00 PM – 8:30 PM

Rm 1412 John S. Toll Bldg., University of Maryland
